

# How to Delete a Plug

- 1 Navigate to [area.alexandrejublot.com/plugs](https://area.alexandrejublot.com/plugs)

- 2 Click "Edit" for the plug you want to delete

3 Then click on "Delete"

The screenshot displays a user interface for managing a plugin. At the top, there are two blue dropdown menus labeled 'Action' and 'Values', each with a downward arrow. Below these is a light blue button labeled 'ADD STEP'. Underneath the button is a blue card with a lightbulb icon and the word 'Action' on the left, and a trash can icon on the right. Inside this card are two more blue dropdown menus labeled 'Action' and 'Values', each with a downward arrow. Below the card is another light blue 'ADD STEP' button. At the bottom of the interface are three buttons: a light blue 'CANCEL' button, a light blue 'DELETE' button with a yellow circular highlight, and a dark blue 'SAVE' button.

That's it! You should be redirected to the plugs page and not see the plug!
