

How to Connect to a Service using OAuth2 on Plug-It with Android

- 1 Click on "Connection" for the service you want to connect.

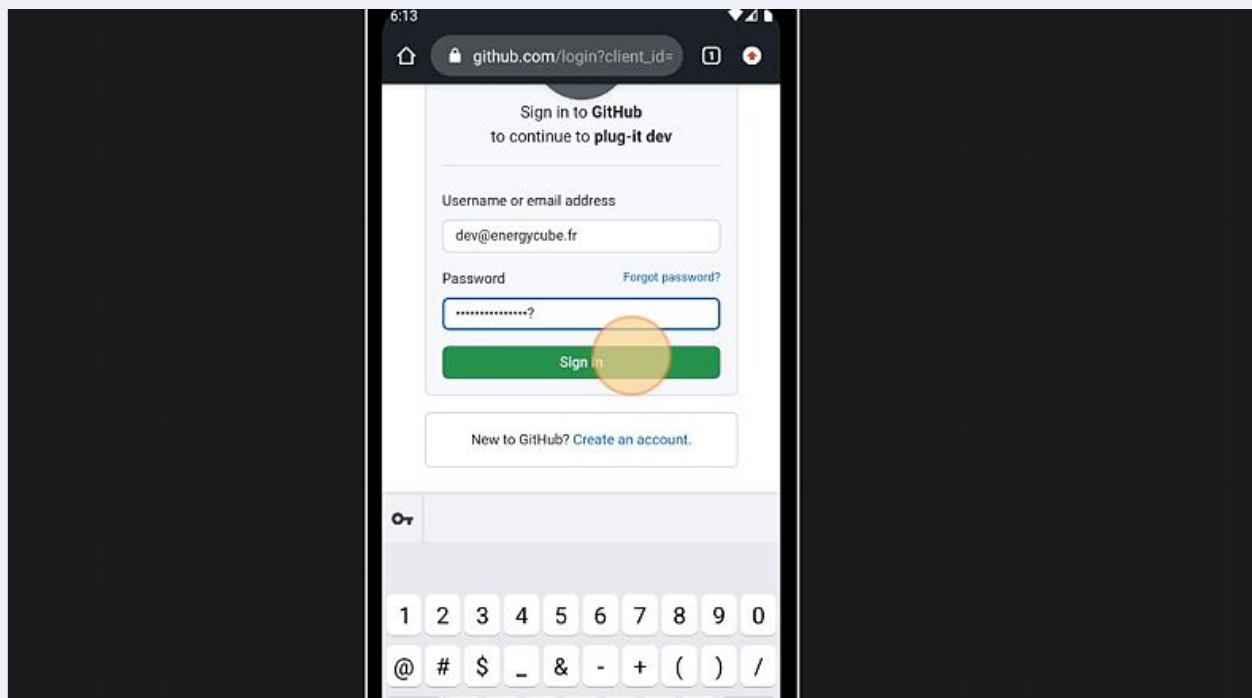

The login process can be different but the overall process is similar. For this example we will use Github OAuth2.

- 2 Fill the required information to login on the service connection page.

- 3 Then click on the service login confirmation button.

4

If you are prompted to confirm the necessary permissions for the service to function, click on "Continue".
