# How to Connect to a Service using OAuth2 on Plug-It

1   Navigate to area.alexandrejublot.com/services

2   Click on "Connect"

> (!)   The login process can be different but the overall process is similar.
> For this exemple we will use Google OAuth2 with YouTube.

3 Select the account you want to use to login, remember that some services may require an access to your account to do some account specific actions or events, so select the right one for what you want to do.

4 (May not be required) If you are asked to confirm that you trust the application, click on "Continue".

5 If you are prompted to confirm the necessary permissions for the service to function, click on "Continue".
